

THE SOLUTION FOR PERFORMANCE AUDITS & CAPEX JUSTIFICATION

RapidView

RapidView™ collects data instantly using wireless sensing stations. A rugged portable solution, setup takes less than two hours with visualisation tools that are ideal for equipment audits and CI Initiatives to resolve problem areas rapidly and justify CapEx.

RapidView

BEST FOR:

INSTANT DATA GATHERING & VISUALISATION
TROUBLESHOOTING
CI INITIATIVES
LINE COMMISSIONING

Rapid manufacturing intelligence delivered in rugged, IP rated hardware.

Portable system with setup in < 2 hours

Wireless data capture via battery-powered sensors

Rapid analysis and visibility of top losses

Built-in tactical reporting

Zero impact - independent of existing infrastructure

Built-in Management Routines (Optional add-on)

Benefits & Notable Features

- ✓ Visualise cycle time/speed to verify design speed is being achieved
- ✓ Track Mean Time Between Failure/To Repair of each individual asset
- ✓ Minimise set-up time with portable wireless automatic data capture via battery powered sensing stations
- ✓ Use in-built reports for longer term trending and analysis
- ✓ Monitor lines or individual machines to identify lost performance and drive efficiency improvements
- ✓ Target OEE improvements and drive effective decisions with 6-Loss detailed analysis
- ✓ Drill down to analyse productivity loss by line, area, machine and more
- ✓ Identify time savings within your manufacturing operations and reduce idle time
