

THE SOLUTION FOR MULTIPLE INDEPENDENT MACHINES

MachineView

MachineView™ collects production data directly from single machines or machine groups providing all the visualisation necessary to drive effective decision making and help improve your OEE.

MachineView

BEST FOR:

REDUCING MACHINE DOWNTIME

FACTORY DASHBOARD FOR MACHINES AND MACHINE GROUPS

TRACKING AND IMPROVING CHANGEOVER TIMES, MAINTENANCE KPIs AND MORE

More than just a reliable machine OEE metric, it provides powerful, actionable drill-down analytics for increasing production output

Add-on modules available:

Built-in Management Routines

Instant visibility of top production losses

Real-time overview of factory performance

On demand reporting suite

Precise automated downtime allocation

Benefits & Notable Features

- ✓ Target OEE improvements and drive effective decisions with 6-Loss detailed analysis
- ✓ Track Mean Time Between Failure/To Repair of each machine
- ✓ Monitor groups of machines/areas/cells to compare OEE, efficiency and KPIs
- ✓ Get ROI at any budget; a scalable, modular system to allow expansion of functionality and the factory coverage over time
- ✓ Gain reject insight with real-time reject monitoring and analysis to minimise lost output
- ✓ Enable company-wide access at no additional cost with unlimited user licenses
- ✓ Visualise cycle time/speed to ensure design speed is being maintained
- ✓ Leverage existing data sources with automated data capture direct from a PLC or remote I/O
Supports OPC /Wiehenstephaner / Modbus standards / SQL
