QUALITY

STANDARDS
PREMIUM FEATURE

Turn paper quality checks into a digital process with DigiView™ Quality.

Audit and improve your quality inspection processes with the recorded data and ensure peace of mind with historical records for compliance evidence.

DigiView
QUALITY

A configurable system for digitising manual quality checks for scheduled inspections and compliance.

DigiView™ Quality Provides:

A flexible, self-configurable platform for the user to define the check procedure, result type and frequency

A control station timeline summary, identifying checks as: completed and the result, in progress, scheduled or requires recheck

A live shift-based history for each control station and associated check enabling compliance follow-up

Instant feedback against configured standards

Operator alerts when checks are due

Accurate data for tactical and strategic analysis

Other Notable Features:

Configurable red/amber/green status for control station and check result status indication ✓

Configurable KPI measure ✓

Barcode scanning capability for material traceability ✓

Strategic reporting and trend analysis through cloud based data visualised via BI tool ✓

Product and shift team recording per check ✓

Pre-requisites:
VPN access for support
LineView™, MachineView™ or DigiView™ system in place
