XL PLATFORM

EFFICIENCY

THE SOLUTION FOR
BOLT-ON PRODUCTIVITY IMPROVEMENT

The XL Platform is a complete bolt-on solution that provides real-time downtime tracking and shop floor visualisation. The system includes the XL810 Productivity Appliance and cloud application to leverage data insights and reports for over 100 metrics and 20 preset parameters.

XL **PLATFORM**

From £3,800

Compatible with Wi-Fi devices.

Benefits & Notable Features

✓ Bolt-on to any machine. Requires only run and reject signals for accurate OEE and 100+ performance metrics

✓ Software is built-in, with nothing to load onto PCs

✓ Real-time, accurate tracking of downtime monitors when your machine is running and when it is down, providing reliable data to decision-making

✓ Handles multi-product lines, multiple run rates, and pack size changes

✓ Plant floor scoreboard enables operators to view performance and make adjustments in real-time

✓ Track changeovers, set targets, and see real-time performance to that target

✓ Web-page interface provides real-time performance and historical trend analysis available across your network

✓ Exportable management reports by shift, job and product type for tactical and strategic decision-making

✓ Dashboard screens link multiple devices together, via the web-page interface, to view performance across the plant and even multiple sites.
