**DigiView**

STANDARDS

THE SOLUTION FOR
DIGITISING OPERATIONAL PROCESSES

Get the paperless manufacturing software that's flexible enough to manage everything and correlates with production data.

DigiView

DIGITAL QUALITY MANAGEMENT

Prevent reworks and waste with quality management that is 100% audit-ready.

RELIABLE QUALITY MANAGEMENT

DigiView uses workstations and roles to match the way you work. Users can be prompted to complete checks and recheck when required. Manager approval processes confirm data is correct and corrective actions have been taken.
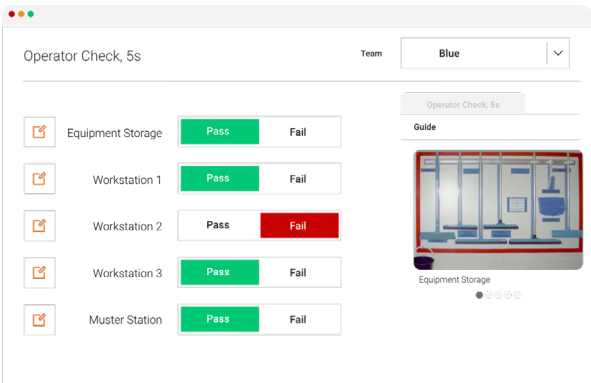

TRACK AND IMPROVE QUALITY KPI
- Waste data collection like units scrapped
- Line quality checks for audits
- Standard work/quality compliance levels
- Raw materials tracking
- Line setpoints versus actual

> Boost quality KPIs like Right First Time and % WIP

> Simplify GMP tracking with digital audit checklists

PAPERLESS SHOP-FLOOR

One digital standard to improve productivity and eliminate manual data.

IMPROVE EFFICIENCY BY 1-2%

DigiView is a digital 'paper trail' on the shop floor that is less labour intensive and fills the reporting gap left by manual systems. Operators love a single access point for all checks and that it's easy to use, ultimately improving productivity and adherence to standards.
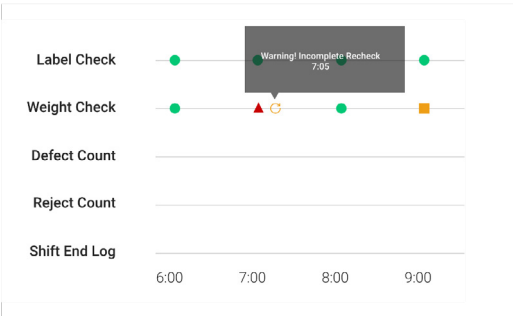

GO PAPERLESS, ONE CHECK AT A TIME
- Batch traceability & parameters
- Planned production vs. actual, OEE
- SOPs, training & compliance
- TPM, CIL & maintenance checks

> Manage planned downtime to focus activities

> Reduce risk with audit-ready Health, Safety & Environment tracking

SHIFT HANDOVERS & SHIFT-BASED CHECKS

Take every shift from good to great with scheduled operator checks and digital handovers.

IMPROVE SHIFT PROCESSES

Even teams at fully automated sites struggle to compile shift-based data contained in paper checks, different systems and equipment. DigiView is a simple check system that's efficient for operators and flexible enough to incorporate any shift-based process.

STANDARDISE EVERY SHIFT
- Site level action tracking
- Safety checks and incident reports
- Productivity and scheduling
- Pre/Post changeover checklists
- SIC checks

> Digitise asset care and equipment maintenance routines

> Have complete transparency from shift to shift

UNLIMITED CHECKS. UNLIMITED USERS.

Plus, pricing that lets your team take a no-limit approach to paperless manufacturing.

- ✓ TPM Checks
- ✓ Machine/Area Safety Checks
- ✓ Line Quality Checks
- ✓ Changeover Checklists
- ✓ Site Utility Checks
- ✓ Manual OEE system
- ✓ Site Level Action Tracking
- ✓ 5 Why Problem Solving
- ✓ DMAIC/PDCA Project Tracker

DigiView

Whether it's your first or last step in digital transformation, paperless operations empower teams and build end-to-end traceability across any process.

No Code Checks
A flexible builder module makes it easy to set-up any check or process.

Visual Factory
Operator shift progress charts and image-based checks help teams manage daily tasks.

Live Check View
Real time view of status, across each site or the entire enterprise.

BI Reporting
Traceability and drill through analysis correlates with other production data.

Benefits & Notable Features

- Prompt operators with visual checks to ensure production within tolerance.

- Trends and quality issues are visualised live and historically.

- Use video and images as work instructions to guide operators

- Use templates with a drag and drop builder to bring any process online

- Correlate with production data and track waste, CI projects, TPM and more

- Document every shift in real-time with zero lag in reporting. Includes ability to compare teams, lines and even sites to benchmark performance
